

# Art for Everyone - Art for All

Wilfred Achille and Tai Lau

We see  
'Art & Architecture'  
as a process to  
open ideas in 'seeing'  
things/designs.

## PRESENT

- We would like to see 'Art For Everyone', ie, for Joe Public, and not for an exclusive few sections of society.
- We are very much engaged working with residents & community in the regeneration project.
- We are involving artists to consult and work with the community, to open up dialogue and to expand 'Art For All' to all sections of community.

## FUTURE VISION

- We would like to see the new generation of Architects & Artists take up social issues and work with the public as an alternative approach to 'Art & Architecture'.

## Mode I

- Mode I Architects use 'Art & Architecture' as the design motto for the office.
- We see 'Art & Architecture' as a process to open ideas in 'seeing' things/designs.
- We see the process as more important than the end result.
- It is important for the architect and artist to have a dialogue at the beginning of the project (before any design is put on paper) to discuss the individual perspective to 'seeing' the concept/approach.
- We are looking for 'ideas/view's to bounce off each other to further develop the way we 'see' things.
- The end result is that both parties gain an understanding and insight into different disciplines of 'seeing' things.
